### Review

---

Clash is a great multiplayer game, which combines both simplicity and fun. The game was developed and published by Supercell in March 2016. Now, it has gained great popularity on the market, mostly because it is easy to play and has some amazing features that make you want more.

Clash Royale is a mobile game, which requires unique strategies. Installing the games takes only a few minutes so as learning to play. A great thing is that it takes you no time to understand how to play. It takes you not more than an hour to realize how things work. The rules are simple. You need to defend your towers and, of course, destroy the towers of your opponent. The game gives you the opportunity to play one versus one or two versus two. That means that you can play with your friends, which makes the game even more exciting.

While playing the game, you have three towers- two small ones and a King tower, which stands in the middle behind the other two. Your opponent has the same set up as you. During the battle, you can send different warriors, who fight for you and your King. Those warriors are presented as cards, which are shown at the bottom of the screen. When you want to summon a warrior into the battlefield, you just drag the card to the place you want him to go. In order to use the cards, you need a certain amount of elixir. Each card costs different amount of elixir. You collect it over the time you play the game. Except for the warriors, you can send various spells and buildings, which will help you win the game. Opening them requires elixir too.

Every single card has a wide variety of strengths and weaknesses. It might take some time to remember them all, but learning their abilities is of great importance.

Another interesting thing about the game is that while you play, the clock is ticking. After there are 60 seconds left, the elixir starts regenerating much faster, which makes the game extremely exciting till the last second.

The game might last only three minutes, but you can be absolutely sure that those three minutes, especially the last one, are going to be full of fun and excitement. You need to make fast decisions, choose the best cards for the situation and think of unexpected strategies, which will surprise your opponent. Only then you will be able to catch the pleasing and well-deserved victory.

## ✓ Pros

---

- Interesting battles
- The game updates regularly
- There's a lot of planing
- Brain exercise

## ✗ Cons

---

- You need Wifi for downloadable contents
- Takes up a lot of space
- Updates
- Battles can be stressful
