The simple **game Cube Surfer!** it has become quite a hit in recent times. And it is that what has managed to hook millions of players around the world is the difficulty found within that simplicity, because although it seems easy, it is difficult to master this cube surfing.

This fun 3D racing game encourages you to move on top of a colored cube while dodging the different obstacles that appear on your way. **Download Cube Surfer! free**, you find it compatible with **Android** and **iOS** operating systems.

The game is to go surfing through the different levels while you accumulate more and more cubes under you, in which you will have to control not to fall in this infinite tower while you slide down the screen and dodge other obstacles that will do the thing more complicated still.

Keep leveling up without falling down, that's the main challenge. The first thing you will have to do when **playing Cube Surfer!** is to know their rules. The accumulation of cubes is essential to successfully overcome the screens, if you don't it will be impossible to reach the goal. This is because every time you collide with other blocks of a different color they will subtract your own dice and this will mean that if you do not have several accumulated, you will collide with the obstructions on the road and lose. This is why it is so important that you calculate how many you may need to reach the end and above all that you always have a good number of cubes accumulated, better than missing them.

As if everything you have to do was not enough, you will also have to collect the purple diamonds that will appear in each of the levels, these will allow you to buy more cubes with which you will start the other screens with an advantage.

One thing that you always have to remember, and that will help you rise to victory, in the game **Cube Surfer!** It is practicing a lot to improve your skills more and more, little by little you will understand better how it works and you will become a true cube surfer.
