Review

Throughout the history of humanity, new and better buildings have always been built that make us evolve as a society. At the same time that the constructions grew more and more, others are also destroyed that the passage of time made them lose their splendor. It is the life cycle of buildings.

Now you can also feel like a real building destroyer with one of the most popular games of the moment. The Voodoo studio has launched an original title that comes to pick up the witness of its predecessors and that has already crept into the most downloaded of the main virtual game and application stores, with a different and very entertaining proposal. **Download Demolish for free**, you find it available for **Android** and **iOS** operating systems.

Your main mission will be to destroy the buildings of a city with your catapult, with a slow pace so that you can recreate your destructive action and that you can aim well to find the key points that will make the construction fall with the least number of touches possible. .

Although the number of buildings is not very high, the truth is that this game can be very addictive. These constructions have a good graphic design, standing out above all in the amount of detail that is shown when they fall destroyed. Users can be destroying blocks for hours, beating one level after another in the **Demolish game**. It can become a very relaxing activity and as you go through the different screens, the demolition challenges will get more complicated, making it very interesting and you have to figure out how to get them and pass the level.

Get perfect scores that will make you clear the screens quickly and easily. **Playing Demolish** will make your technique improve as you progress, control your strength, measure distances and practice to get better and better points, since one of the main characteristics is that you will need to sharpen your aim and destroy your next building. With just a tap on the screen of your mobile phone you will launch the bombs against the buildings and make them fall.

✓ Pros

- Good graphics
- Original proposal
- You can spend hours and hours playing

✗ Cons

- Too many advertisements
- Sometimes buildings are not demolished
- Failures in general game mechanics

- Variety of buildings
- Needs more levels with greater difficulty
