Review

Explore the open world of Garena Free Fire and manage to fight all your enemies. It is a Battle Royale game where whoever manages to be the last survivor wins, either individually or as a team. Originally designed for mobile devices, download **Garena Free Fire for free**, you find it available for **Android and iOS** platforms and also for computers.

The game begins when you find yourself in a plane with 49 other players, these will be your enemies once you are thrown and touch the ground of this battlefield in a war of all against all. Your objective is clear, stay alive until the end while you eliminate the rest of the rivals. As if this were not enough of a challenge, you will also have to be careful with the area you are in, every so often in the game it will be reduced so that each time this happens the space to fight will be smaller and smaller, reducing the chances of fleeing or hiding from any attack. It is important not to lose sight of the warnings that will appear on the screen that will alert you to the closure of the playing area, if you get lost you can be eliminated for this, dying within seconds of staying outside the marked terrain.

To help you on your mission, equipment that will serve you on your mission will appear on the map. Be the fastest of all and collect it before the others, weapons, vests and tools will come out that will allow you to be more equipped than the rest. Speed is essential in **Garena Free Fire**, for this you will have to master its controls and not be afraid of losing by taking risks.

Try to be the fastest when leaving the plane, in this way you will have more opportunities to have the resources available and above all, try to fall in an area where there are objects, this can mark the rest of your departure.

One of the characteristics of Garena Free Fire is its graphics, designed in such a surprising way to achieve an experience like no other. Its playability and interaction make this video game one of the best and that is why it has become one of the most downloaded, with millions of players spread all over the world.
