Review

If you are looking for a title with which to spend hours of fun and never get bored, this is **Stair Run game**. An endless game in which your main objective will be to climb to infinity through colored stairs.

It has a very simple mechanics, you will have to collect the blocks that you find on your way to build the steps that will allow you to continue climbing through these colored screens, which will change. You will have to be very careful because if you do not place them correctly, you will crash and lose, making you have to start over. **Download Stair Run for free**, you find it available for **Android** and **iOS**.

One of the main **advantages of Stair Run** lies precisely in its simplicity, it manages to overcome the screens and level up, as you progress through the game they will become more difficult to overcome, so you will have to give your best and think very well , and fast, where to put the blocks, because any failure can spell the end.

Build your stairs and earn points, for this reason, at the end of each of the screens the bricks that you still have left will be counted and this can make your score multiply and overcome that level is easier for you. This means a new challenge in the plays, because you will also have to keep in mind the number of bricks that you can use and they will help you win. In the last section of the path you will see a golden ladder with all the multiplication possibilities you have, and depending on the bricks, you will fly to the corresponding step.

With a very simple interface, the mechanics itself will get you to improve as you progress and the way to interact with it will be through taps on the screen, which will make it very precise to collect the bricks and build the platforms. You have to be very aware of all the platforms that will be presented, since some are at your level and others are above, so you will have to build other stairs to continue accumulating blocks and coins. **Playing Stair Run** guarantees hours of entertainment while running through this map.

✓ **Pros**

- Free download

✗ **Cons**

- Contains many advertisements

- Interesting graphics
- Addictive
- Easy to play

- Can become repetitive
- At times very complex
- Simple controls
