### Review

---

**Grand Theft Auto V** is an action-adventure game. The release date for PlayStation 3 and Xbox 360 was in September 2013, for PlayStation 4 and Xbox One in November 2014 and for Microsoft Windows in April 2015. It was developed by Rockstar North and Rockstar Games published it.

The state is called San Andreas (Southern California) and it includes the city is Los Santos (Los Angeles) and the Blaine County. The **game** follows the lives of three criminals - Michael Townley, Trevor Philips, and Brad Snider which organized a robbery in Ludendorff, North Yankton. After nine years in the city of Los Santos, a man has returned. Michael is put under witness protection with his family under a new name. But with his new life, come new problems. It is not a long time after he makes new friends - the gangbanger Franklin Clinton, after he tries to steal his son's car. After that he finds out that his wife Amanda has been cheating on him with her tennis coach. Being under the influence of anger and hunger for revenge, he and Franklin destroy a mansion

which they thought it was the coaches. It turns out to be in possession of a Mexican drug lord's girlfriend. After that charade they are demanded to pay for the damages. Michael returns to his old style of living, so that he can collect the money and avoid other violence. He is not alone in his mission. Franklin, Lester and Trevor join him.

You can walk by foot or use other means of transportation. This version of the game has more vehicles than the previous ones. You can use planes, helicopters, jet skis, emergency service vehicles, submarines etc. The game can be played from a first or third-person perspective. The entire map is unlocked from the very beginning, but with progressing in the game you can unlock some other features. The map is larger than the one in GTA IV, and there is more open space to explore. The surroundings now include other cities, deserts, farmlands, wilderness, a military base, a detailed ocean floor. There are different scenarios to make the game more realistic. They were present in the previous version, but here they are brought further. Different vehicles and pedestrians may bump into you, emergency vehicles may drive by you as they are responding to an accident etc. There is also a larger collection of weapons.

When the player has jumped from too high or damaged himself in any other way, his health is worsened. It can gradually come to its halfway points. If the character breaks the law (stealing cars, shooting, etc.) he will be chased by the law enforcement.

## ✓ Pros

---

- Innovative 3-character story, switching.
- Characters have great personalities.
- Trevor finally makes us feel like they were playing "Bad Guy".
- World feels truly alive from the sky to the mountains to the bottom of the desert ocean, the praise of wildlife is fine.
- The graphics are greatly improved since GTA 4 (this is not debatable).
- Graphics are great (my opinion).
- More realistic and much improved driving of GTA 4 also like any other GTA game.
- Many fun mini-games.

## ✗ Cons

---

- Lack of fan favorite side missions (gang wars, police missions, fight club).
- Bad music.
- Lots of buildings are not accessible (only 19 I think you can steal).
- Not as many "activities" as it seemed that we needed Rockstar.
- The Police can see through the walls, but sometimes they cannot.
- New search system is bad.
