

## Hitman Sniper

By SQUARE ENIX Ltd

6.4/10

android

ios

### Description

---

As we go forward missions, and depending on the score we get in each of them, we will not only surpassing the missions, but also we will be able to unlock new weapons that will help us very much in the different murders that we must commit. In total there are 13 different weapons that we can use the way we want as we go with them. In case you're wondering, Hitman Sniper may seem like a simple game, since we only have to perpetrate murders from afar with a sniper rifle, but in reality there is much more behind this game, which we warn you will be anything but simple. Of course, if bloody games are not your thing, maybe you should take a new look in the App Store or Google Play and fall for another game of your style. Remember that it is not a game that can be downloaded for free, but we do warn you that there are many times of the year in which we can download the game without spending a single euro. If you have patience and after reading all this, you do not want to download it, and you prefer to be patient, you can save money, although we already warned you that for the price you have and the fun that it will offer you will not compensate for the wait. Ready to start firing with a sniper rifle and go on missions in Hitman Sniper?

### Review

---

**Hitman Sniper** is an action game for mobile devices, which was released in 2015. It is really smart by Square Enix Montreal to decide creating the game for mobile devices, because today most people use their phones everywhere. Plus that they wear them everywhere they go all the time. And what a better way to kill some time than playing a game. There are many available games for Android and iOS and the variety of genres is astonishing. There are two types of mobile games. First are free games and second are those that are paid or premium. It is true that the more popular ones are the free ones, because of the obvious reason that you pay nothing, but there are paid games that are so good that money can not stop people from buying them. Such example is Hitman Sniper.

Hitman Sniper is an action game with a lot of shooting. You start playing as Agent 47, a highly skilled and invisible assassin, who has various missions to take out different high-profile targets. But the catch is that all of them are secured with guards who patrol all the time around the buildings. While playing the game you have an assistant, Diana, who provides you with important advice along with some critical information.

Hitman Sniper is a shooter game, where you kill people while using a sniper. You can zoom in and out for targets that are near and far. Also, each game has a 10-minute deadline, in which you have to complete the mission. The best advice for perfectly completing a mission is to eliminate first the secondary targets and then the main one, because, if you leave the secondary ones unfinished, you may lose the mission or have fewer rewards. As you improve in the game, the missions become harder, which is great, because the game does not become boring.

The game is separated into several parts and every part has multiple missions. As you finish successfully missions, you gain points and experience and go on a higher position, which motivated you to play even more. Thanks to Google Cloud after each game your score is automatically saved so you do not lose any data during the process.

A great thing is that you can share your missions in different places like Facebook for example. You can play the game with either friends or just random players from all around the world. Playing with other players makes the game more competitive and, of course, interesting.

Hitman Sniper is a shooter game, which is extremely easy to play. The variety of missions is an amazing joy. Lastly, the sounds definitely need to be mentioned. Especially if you play with headphones, the audio effects are simply astonishing. Also, the graphics on this game are the best you'll find in its genre. Everything looks extremely realistic, which is amazing. As a whole the game is a tactical and puzzling type of game. It is perfect for people, who are fans of the action games with some brutality involved. So, with all the advantages like the graphics and the sound effects, the game deserves to be called a well-made product.

## ✓ Pros

---

- Fun is guaranteed if you like action games
- The price of the game is negligible compared to the hours of fun it will offer
- The graphics, sound and gameplay offered by Hitman Sniper are absolutely spectacular
- The huge amount of missions that it offers us will make us enjoy the game for a long time

## ✗ Cons

---

- Sometimes some of the missions are somewhat complicated and can give us more than a headache
- The battery consumption is high and it is that we do not face any game, but it is one that needs a large amount of resources from our device
- The missions are more or less repetitive
- Violence in this game

## Tips

---

1. Have patience when shooting and you will achieve your goal. In most cases the rush is not good
2. Do not be afraid that it is a game of payment since any investment will be very worthwhile
3. Enjoy the graphics, sound and gameplay since in a few games you can live an experience like this
