### Description

---

Pou is an interesting game on the iPhone and iPad , in which your task will be to take care of a nice monster. You have to remember to feed him, wash him, clean up after him and make him not too bored. The game's mechanism is most reminiscent of Tamagotchi. At Pou, we have a lot of variety to make sure that the game can get us in for good. The game is played in real time, which means that you do not have to have an open application. Just once in a while, take the phone out of your pocket and check how our little friend is doing. Every day, your Pou can stay in several rooms: kitchen, laboratory, playroom and bedroom. Each of these places has a different kind of activity to offer to our mentee. In the kitchen, you can treat yourself to fruit or sushi. In the laboratory, we will wash it and heal it when it is sick. In the playroom, we can play with him with a ball or play one of many other games, and at the same time get the coins necessary for shopping. In the bedroom, our Pou will rest and regain strength after an eventful day. Coins collected during games and performing various tasks can be used to change the appearance of Pou or decorate his rooms. Our creature can get from us a mustache, glasses, a new eye color or change the wallpaper in one of the rooms. Some of the games in the middle of the Pou game are quite interesting, others are not likely to draw you in for a long time. Unless you really need to get some coins ... Navigation Controlling in Pou is very simple. The corresponding buttons responsible for the given activities are located around the form of a sympathetic creature. At the top of the screen you will find our points and icons for health, activity and hunger Pou. By clicking on the arrows, we can change the rooms where new activities are waiting for Pou. When it comes to internal games, of course, we control Pou by touch. Appearance and operation Pou has a very simple graphics that does not stand out. Game developers focused on

### Review

---

**Pou** is a game available for both Android and iOS. It is an app, which looks quite similar to Tamagotchi- quite an old game that many of the kids today will not know. Pou was developed by Paul Salameh and released in August 2012, but even now it still has its popularity. The game is about taking care of an adorable pet, looking like a brown triangular alien, called Pou. You have to feed it, play with it, put it to bed, etc. If you do not feed it properly, its health levels will go down. You can choose from many foods that your Pou is going to eat and the amount too. But you really have to be careful, because with too much food intake, Pou becomes fat, which is not

recommended. If however, your pet becomes fat, you can always buy a magical potion from the store that will make it fit again.

Taking care of Pou is not the only thing about the game. First, you have a wide variety of clothes to choose from, which you have to buy with coins. Earning coins and rewards might be very interesting and funny. You have many games, which you can play with your pet such as Sky Jumping, Hill Driving or Memory. The more games you play, the more coins you will earn, which is amazing, because you get coins while having a lot of fun. Another great thing is that while playing minigames you not only win coins, but also your Pou grows up and from a baby it can become an adult.

Some minigames even have a multiplayer mode, which requires internet connection and helps you play the game with friends and other Pou players. You can see each others pets, which is amazing. Also, you do not need to worry about your pet being changed by other players, because the account of yours is blocked for changes by others.

Except for playing games and dressing up, you have the ability to change the background color of the wall and also, you can change the color of Pou itself. Purchasing different things from the store is really easy and useful. For example, there are many potions that can help in different ways to your pet. You can even buy a potion, which keeps your Pou healthy without feeding, playing and sleeping.

Pou is an interesting game, which is mostly played by children, but that does not mean that adults can not have fun. The game has absolutely adorable looks and really cute sounds. As a whole, the game is great, easy to play, and a perfect solution for killing some time.

## ✓ Pros

---

- We are automatically rewarded with coins for each action.
- You can play many internal games
- You can buy him things
- It is not a violent game at all

## ✗ Cons

---

- It is not intended for everyone.
- We are a website strictly dedicated to mobile technologies.
- Nothing impressive
- You can't die, which is weird

## Tips

---

1. Well, the easiest way to get a lot of chips is simply to buy them as part of a micro-transaction
2. Another quite nice way to earn a set of attractions for Pou are mini games
