### Review

---

The most complex game is not always the one with the greatest popularity or success. There are titles, deliveries or proposals that have a simple structure but still do not stop entertaining players of all generations, beyond the passage of time. There is a free game that we all know, that we all had on our Windows computers since 1990 and that we can now **play for free on mobile phones**.

Solitaire **started** as the invention of a young developer at Bill Gates' company and became a classic of the Windows operating system. Nobody is unaware of the game and it is recognized worldwide. Now thanks to Zynga comes the opportunity to download **Solitaire for free** and enjoy this classic in the comfort of our mobile terminals.

Zynga is a company that usually presents free and quality app. Among the products offered for Android and iOS we can find: FarmVille, Harry Potter: Puzzles and Magic, Zynga Poker and Word With Friends 1 and 2. As always, their aesthetics and game mechanics are very well developed.

When **playing Solitaire** we will find these quality brands to which the company has accustomed us. And the challenge in this title is inexhaustible. We will always have new proposals available that will test our ability to play solitaire. There are daily challenges as special events.

Among other **advantages of Solitaire** we will have the possibility to configure the appearance of the deck and the board in a personalized way. As well as activating a special left-handed mode, using an undo button, requesting tracks or mixing the deck again with just one button.

If you want to have the experience against other users, you have the chance to record your statistics both to follow and improve them and to compete against other people. Prove that you are the best in this classic of classics.

Solitaire is a free application that will ensure you a good time of entertainment. Being a free game it has advertisements within the program. Stay entertained and exercise your mind with this Zynga proposal. Look for the best combinations to win the game as quickly as possible.

#### ✓ Pros

---

- Very entertaining game
- Ability to change the color of the cards

#### ✗ Cons

---

- For some it may be boring
- Presence of advertisements

- Special mode for lefties
- Variety of game options
- Complex challenges
- It works slow at times
