

## WhatsApp Messenger

The most important, fast and effective courier service on the market

android

ios

### Review

---

There is no doubt that **WhatsApp Messenger** is the way to communicate par excellence in recent years. The messaging service was born in 2009 and in 2012 it exploded in popularity. Everyone uses WhatsApp Messenger. Its growth was so important that it put aside all kinds of alternative communication.

Why should you **download WhatsApp Messenger**? First and foremost because the program meets the most important premise that every app must meet, it is easy to use, simple and intuitive. You won't get lost in confusing menus or conflicting instructions. You just have to enter your mobile phone number, confirm it by receiving an SMS and voila, you already have your WhatsApp Messenger account activated.

The messaging service can be installed on devices that have **Android or iOS** operating systems, it also has an efficient mode for computers known as WhatsApp Messenger Web.

One of the **advantages of WhatsApp Messenger** is that it allows you to send and receive messages, images, videos, documents, audio files and more without any additional cost. That is, it can be used with a basic data plan or a WIFI connection. Even if users from different geographic regions connect, there will be no additional cost.

One of the most used and preferred functions of users is to arm groups. The platform allows you to organize chat rooms with many people, without limit of users, in which you can exchange all kinds of files and stay connected.

**WhatsApp Messenger also has the function** to make voice calls or video calls between people. Like messages, this type of connection does not generate additional costs and only requires an internet connection. In addition, a conference of two or more users can be organized.

Another of the **best functions of WhatsApp Messenger** is to share location. People can exchange their geographical positions for a single time or for a time determining that it can be from 15 minutes to 1 hour. This option can be useful both to meet someone and for security reasons to know if someone arrived safely at their destination or not.

Install WhatsApp Messenger for free and join the most complete and effective messaging service.
