ZOOM Cloud Meetings

Connect with whoever you want with quality online video conferencing

android

ios

Review

If there is an application that has been crowned as the undisputed queen of this year, it has been **Zoom Cloud Meetings**, accumulating millions of users and entering the top of the most downloaded.

This software allows you to conduct high quality videoconferences with up to 100 participants. Interact virtually with your friends, work colleagues or whoever you want, **download Zoom Cloud Meeting** for free, you find it available for **Android and iOS** devices.

It has become one of the essential tools for work or school, since with them you can keep in touch and continue with daily tasks. It is based on its own cloud that you can use to make meetings with others, either by video or by audio or both.

You must distinguish between Zoom Meeting and Zoom Room. The first refers to videoconferences that you carry out in the application itself, while the second refers to the configuration of the program itself, the hardware that allows companies that use it to schedule and hold meetings through it.

You will be able to carry out individual chat sessions, group calls, seminars or even web conferences, for a defined audience that you know or reaching more than a thousand people in global meetings, all this connecting up to 49 screens to the zoom room. **Download Zoom Cloud Meetings**, you can use it for free but it also has its own payment plans. These will vary depending on the subscription you want to have from Zoom Room and they will have their own characteristics and exclusive advantages for each one of them. The prices of this paid version vary between \$ 14.99 to \$ 40, you decide what you want to get.

There are differences between the paid plans and the free ones, but in all of them you have to bear in mind that you can only use it on a single device at a time, if you try to open it in several Zoom it will close the session in the first one that has connected.

All Zoom Cloud Meetings applications will allow you to connect to a meeting without logging in, just entering it, and it allows you to create an account from Zoom, Google, Facebook or SSO.
