Review

Mobile technology offers many tools to make life faster and easier for users. One of the main concerns that we have today are those that have to do with expenses, payments, transfers and everything that revolves around our financial life. To help us better manage this aspect there are a wide variety of applications on Android and iOS. One of them is the ones that we have to review today and is the very popular **Pagbank**.

Downloading Pagbank will result in a significant saving of time and money in your life. The platform developed by the renowned communications company UOL, offers you a credit card free of charge, the possibility of making all transfers between users who wish at no cost, a return of 68% with important investment opportunities, online loans, possibility to withdraw cash and make payment of services and all kinds of payments.

Among the advantages of Pagbank is the possibility of paying for all kinds of services such as gas refills or basic bills such as electricity or water. Do not run out of credit on your mobile since you can recharge on Claro, Oi, Vivo and Tim lines. If you are a user of applications such as Spotify or Uber, you will also be enabled to add credits with Pagbank.

Pagbank will not only take care of your economy but also your health. The UOL platform gives you the chance to seek medical and dental care and exams with significant discounts and without having to wait in long lines. In turn, you can get medication with discounts and compete for important awards on a monthly basis.

Using the free **Pagbank app** will give us the opportunity to order our cards completely free of charge. They can be used both in Brazil and abroad, services from foreign websites and online businesses. There are three types of cards: Account card, Prepaid card and Credit card. The account card debits directly from your funds and can be used in all merchants; The prepaid card is to have a better control of your expenses since you can recharge it with the money you want, it is used for both online and in-person expenses; and the credit card you will have the opportunity to have it without having a fee per year or bills per month, you can also extend the expense if you do it in cash and there are installment plans.

If we wish to receive our salary in the UOL financial tool account, we can also do so. This will enable us to make transactions faster and lose the least amount of time possible. In addition, the service includes important investment programs and projects with interesting levels of profitability

for you to do good business.

Another of the great technological advances of the app is the possibility of paying by means of QR code, just by using the camera of your mobile you can make the corresponding payments. This is without a doubt one of the highest points of the service.

Cash withdrawal is also possible at no extra cost on select networks. The service created by UOL also has a solid and fast customer service to answer all your questions. If you are a merchant you also have a wide variety of options available to improve your business. Among them are a sales simulator with which you can analyze how much you will receive from the transactions you make, the possibility of selling easily online with **Pagbank**, managing receipts and a convenient menu to visit transactions made in the past.

We are facing one of the applications that can make your procedures and financial management simple, agile and that does not waste time in your life. Pagbank is comfortable and intuitive. It has great benefits of all kinds, both as users, buyers or merchants we will have something on the platform that will be useful to us.

Although some users complained about the delays in the acknowledgments of the documentation sent or due to a delay in the issuance of cards, Pagbank has a very high rating from customers both on Adroid and iOS.

✓ Pros

- Free service
- Many payment possibilities, a large number of services
- QR Code technology
- Health services benefits

✗ Cons

- Some general operating problems
- Problems in document recognition
- Delays in customer service
- The interface could have improvements to be clearer
