When it comes to taking the car, there can be many unforeseen events that you can find on the road and if you are in a hurry to reach your destination, it is more stressful to find obstacles or a lot of traffic. That is why applications like **Waze** will save you from the situation and make driving much easier.

The application owned by Google, allows you to know in real time all the traffic information and contribute with what you yourself find on the way and thus be able to help other users. **Download Waze for free**, you will find it available for **Android** and **iOS** devices.

It is an app used by millions of users around the world, which gradually makes it more widespread throughout the territories and the information it offers is the most complete, helping you drive better, saving time and money. Waze is based on the voice commands that you give it and shows you step by step the best way to get to a certain place.

With a very active community, called Wazers, all traffic alerts are shared and updated in real time, so you can change routes even while on the road. Those journeys that you do on a regular basis will be saved in the app's memory so that just saying that address will activate the necessary alerts.

As a good social application that it is, every time you connect to Facebook on your device you will receive a notification of the location of your contacts who also have **Waze** on their mobile phones, in this way you will know where they are and the distance to their destination. This will help you see where they are without the distractions of texting. Every time you help by providing road information, you will be rewarded with points that will help you climb in the community's own ranking.

Its positioning and mapping system is more developed than Google's own, which makes it one of the most complete applications. **Download Waze** and be part of this community of committed drivers, helping others and yourself, improving the normal functioning of your city.
