Review

If video streaming services are very popular, audio streaming services are not far behind. There are many platforms that offer you the possibility of listening to your favorite music from any mobile device, with the freedom to listen to it whenever and wherever you want. The offer is so great that choosing just one is very difficult, all of them do not stop growing to continue attracting their audience and their updates are constant to reach those who are undecided.

In this war for control of the largest number of users is **Pandora**, a platform that was born in 2000 and that even today offers us an online music service that no other can match. This free application is based on what we hear analyzing each song to show us the results that best suit our tastes, offering highly personalized products.

Depending on the results obtained from the study of the chosen one, it classifies it according to melody, harmony, rhythm, lyrics, arrangements and other aspects, to offer its users one after another songs or related stations. This way of working is already known as the Pandora Method.

Download Pandora for free, you find it available for **Android** and **iOS** devices.

It is one of the **advantages of Pandora**, which you will find available in both its free and paid versions. Its objective is to achieve more precisely the tastes and preferences of its listeners, defining more precisely what types of melodies we like to listen to through what we are selecting.

You can create your own favorites lists, including topics that we like, or even search for certain keywords, in this way you can personalize the stations that it shows you by making them sound

with the rhythm and the other songs that according to this free application we might like. You can also suggest topics and share them with other people, if you are the author of that work.

It is considered the most powerful music discovery platform, always carry the **Pandora application** with you and enjoy this personalized experience. You will be able to enjoy all the music you like and find those hidden treasures that you did not know, in the form of songs or podcasts.
