Description

When comparing Spotify 's products and services with many other competing brands such as Deezer, Rdio, Napster, TIDAL, Google Music, Apple Music, Qobuz, Pandora and iHeart Radio, there are a few features that play a role in the potential decision of a client. Some of the most important features include: the type or purpose of the streaming service, whether there are free options available, presence of ads or lack thereof, platforms or applications that support each service, how much the subscription costs, and the size of the music library offered. Spotify has an on-demand library where users can create playlists and follow fellow music lovers. Spotify also offers the Spotify Radio that allows users to access numerous modeled stations for artists and musical genres. Spotify offers a free version of its streaming service that includes ads and is accessible from a desktop, laptop or mobile device (6 hops per hour). However, by paying \$ 9.99 or \$ 4.99 if the user is a student, the user is able to access all Spotify features online or offline without any advertising and on any device. Spotify offers a music library of more than 30 million songs.

Review

If we are talking about a service that offers music, videos and digital podcasts in streaming that includes millions of songs and that also allows you to take it with you wherever and whenever you want, you will know that we are talking about **Spotify**.

This platform will allow you access to its gigantic catalog of music completely free of charge and in which all you have to do is choose what you want to listen to and enjoy it. **Download Spotify for free**, you find it available for **Android** and **iOS** devices.

It has become the most important of the moment and is the most used throughout the world. New competitors have emerged who have wanted to take over her throne, but it is still the leader due to the amount of content it has. None can overshadow it. Its more than 140 million active users attest to it. You can use the free application, although it also has a paid version in which you can enjoy its content without any advertising break and other advantages.

Its large library is categorized in the most unusual ways, such as depending on your mood or the activity you want to do. With Spotify, you are the one in control of everything you want to listen to.

Every time you enter you will instantly have all the music you have, offering the possibility of creating your own playlists in which to save your favorite songs to listen to them whenever you want. You can enjoy these online or without an Internet connection.

The **Spotify application** makes discovering and sharing new music with other people much easier as it is connected to the main social networks, so all your friends will know what you are listening to. You will be able to enjoy all the songs you want, it has from all over the world, from well-known artists or from others that are not well known yet. There is a song for all tastes and depending on what you are listening to, the app itself will create a weekly discovery list that includes other songs of the same style that you like.
