Regardless of whether we live concerts or an exclusive event, TIDAL X provides our members with access to exclusive tickets, meetings and meetings, and behind the scenes. Import your playlists. Easily send playlists to TIDAL from any streaming service and directly from files. Of course, you can create playlists, share them with friends, listen to artist-based or song-based radios, check artist biographies, find similar artists, edit the playlist, and much more ... Subscribe to the TIDAL subscription in the application where you can choose between Premium and HiFi. The subscription is automatically renewed and accrued monthly (30 days). You can cancel it at any time until the day before renewal and you can turn off automatic renewal from your iTunes account at any time.

Review

TIDAL is a global music and entertainment platform that provides us with lossless CD sound quality and music-quality video, plus materials prepared by journalists and specialists.

TIDAL brings music fans to their favorite artists and provides on-demand access to discover new songs from our huge catalog of songs and videos. The complete TIDAL catalog is complemented by exclusive content, including exclusive songs, albums and movies with the participation of the best musicians, athletes and artists in the world. We offer not only access to exclusive digital content, but also the opportunity to participate in unique life experiences, such as shows with recognized or emerging artists and other direct interactions between fans and their favorite artists.

TIDAL is available in more than 46 countries, with more than 36 million music directories and almost 86,000 high-quality movies. The service offers the opportunity to discover new artists through TIDAL Discovery and unique experiences through TIDAL X.

You can create your own playlists, share music with friends, listen to radio built on the basis of an artist or selected music, find artist biographies, view similar artists, edit your playlist and much more!
