Review

This video game saga has been in our lives since 1994 and has more than 37 titles behind it, proving that **Need for Speed** is number one in racing games and that it is unrivaled. Based on the Top Gun movie, this franchise focuses on illegal street competitions. Available for most platforms, you can find it for example for Nintendo 3D, PlayStation, Xbox One, PSP, but above all **download Need for Speed for free** for **Android** and **iOS** mobile devices.

This application will allow you to take your favorite game wherever and whenever you want. With millions of downloads, it is still one of the most popular and its gameplay is so easy that you just have to turn the phone as if it were a steering wheel. One of its main characteristics is that in addition to driving at full speed through the city, you also have the possibility to collect high-end cars, such as Ferrari, McLaren, etc., and then customize them as you want and compete with them.

Need for Speed does not stop updating to continue offering new features to all its players, such as improving its design more and more to create visual and sound effects to make more realistic competitions covering 360 degrees, so that you have the feeling of being a true pilot racing.

Although it is a totally free application, within the game you will have the possibility of acquiring a series of purchases that will be very useful in the game, such as fuel, cars or improvements for these. But don't worry, it is optional and you can always continue to enjoy this title for free.

If the cars he offers you in his gallery do not convince you, you can always create your own racing vehicle from scratch. To do this, use the parts you find in the scrapyards and add all the accessories you want, making it a dream car. In the workshops that you will find in **Need for Speed**, they will also help you to tune your project or even to find one that suits what you want, so that you only have to worry about taking care of your car and repairing the damages that are caused.
