AFK Arena is an RPG and strategy game available for mobile phones developed by Lilith Games. The studios are recognized for other outstanding works such as Art of Conquest, Rise of Kingdoms, Abi, Isoland 2, Soul Hunters and Mr. Pumpkin 2. The graphics of this new **free download game** are quite interesting, there are a large number of characters each one with their own stories to learn and discover. The proposal is based on the theme of Celtic mythology. The delivery invites you to enter every day and is a lot of fun. The goal is to create a team of heroes that we will level up as they win battles against fearsome enemies. Find decent players from all over the world and try to save the ancient world of Esperia.

One of the **advantages of AFK Arena** is that it presents a type of game that is simple, straightforward and challenging at the same time. In other words, you don't have to press many buttons or learn complex controls and mechanics. Just by organizing the attack and defense we can carry out the battle by touching one or two keys. There are automatic and manual mode.

What is most rewarded in the Lilith Games app is perseverance. As we enter our kingdom each day we will receive rewards and challenges to fulfill which will give us greater prizes, gold, experience and gems to spend in the tavern, the place where you can buy all kinds of elements for the game.

When **playing AFK Arena** we will find that friends are a very important part of the app. When you log in, add them from your friends list. Better to have a full list of active friends. With those you add as allies you can exchange resources.

Battles are one of the most important parts in AFK Arena. They have a very used mechanics of the turn-based attack type where our main ally will be the strategy and know well our available troops. There are a few things you can do, like change the positions of your units during a confrontation. Changing positions alters the course of the game. During a fight you have 5 spaces to occupy with your heroes, at first it will be easy to put characters in those spaces. But as we have more figures we will have to choose according to the strategy and the type of attack we

want to do. It will also be important to take into account the ability of each of the heroes that we deploy.

The RPG for mobile offers us a variety of options beyond the battles. We will have various game modes including a Campaign Mode with 30 levels, a place like the tavern where you can buy objects, the possibility of building your home, and labyrinths that include ingenious proposals.

One of the main characteristics is that it is an easy video game. Here you do not have to dedicate many hours or spend a large amount of money to advance. You will receive endless daily rewards. You just have to relax and enjoy the beautiful graphics of AFK Arena.

The audiovisual section is one of the most outstanding aspects of the game along with its simple and intuitive interface. The Lilith Games product brings us a series of drawings that have a very particular style and it seems that they are made by hand.

We are facing one of the most interesting **free mobile games** on the market. Different types of users can enjoy it, not just those who are used to games. It is a beautiful experience with very good graphics and that we can face it in a relaxed way.

Now, if we want to make the most of AFK Arena, we can also do it since the game presents a good variety of heroes with very different abilities. In addition, the way we combine them on the battlefield will make each fight different.
