Review

One of the most developed activities online is the buying and selling of all kinds of products. Whether new or used, all items have platforms available where they can be traded or monetized. There are a number of **free apps** and well-crafted sites that host the ability to trade online. One of the most used platforms with the best impact on the market is **Vinted**.

Vinted was born in 2008 and since its launch it has not stopped growing. Today it has an international presence throughout several regions including: Berlin, United States, United Kingdom, Lithuania, Austria and Spain. The community that enjoys Vinted's services is estimated to be over 30 million people.

You can manage your profile from the website if you use a computer or **download Vinted for free** on your mobile. The app works on both Android and iOS. It is an international community where you can sell and buy used clothing.

The main **advantage of Vinted** is that you can advertise, publish and sell totally free. There are no extra commissions and the seller receives the money directly once the buyer confirms the arrival of the product.

Security is one of the most and best worked aspects of the platform. You can have a conversation with the seller and payments are managed by credit cards, Vinted balances or PayPal. You will also get all the information about the route that is placing your order from the moment of shipment.

By using Vinted you will find a great offer and variety of items. We recommend that you browse freely among the large number of categories that you have available such as shoes, bags, accessories, beauty and household items. You have available products for women, men or children.

Vinted is one of the best proposals that you can install on your mobile. It is very safe and offers many options that will make your transactions do not suffer any kind of inconvenience. It will also give you the possibility to get the maximum benefit from the products you want to put on sale.

✓ Pros

✗ Cons

- It does not charge commissions to its sellers
- Security in the sale.
- Different payment methods.
- Refund if something is wrong.
- Shipping costs.
- Pay a fixed fee of € 0.70 plus 5% of the price.
- Vinted is paid and the seller does not arrive until 3 or 4 days after the package has been received.
- They do not send it to your home, it has a series of collection points.
