The most famous neighborhood in the world arrives, managing to remain one of the favorite sagas of millions of players. With The Sims you can create families and control their entire life, all from your mobile device, **download The Sims for free**, available for **Android** and **iOS**, or get it for its multiple platforms.

It has a very active community that focuses on creating content to continue giving life to its neighborhoods. The limit is set by your imagination, you can choose unique personalities with which you will build very detailed and interesting characters, which will give meaning to the story you create.

With very creative tools, spend the time you need to make your character, it is the most important aspect and therefore the one that has to be taken the most care. He will be the one who accompanies you throughout your adventure, so the details are very important and you will be able to choose every last feature, from the physical to the personality traits, which must be adjusted to what you want it to convey and which will mark its future relationships with other close people.

In **The Sims** you have full control over the customization of all its features, if creating your character is important, building your own house is also important. There are two neighborhoods to choose from, Willow Creek or Oasis Springs, and the home you want to live in has different options too. Each neighborhood has its own hidden history, so you will have to explore yours to discover its secrets through a series of actions that will guide you through this adventure.

Keep creating characters and increase your family, in this way you can interact with the rest of the neighbors in a different way, because each one will create their own relationships. Explore all the possibilities that **The Sims** offers you, a totally free game in which you decide how to live in this virtual world and have fun while watching them grow and face the obstacles that arise in their day-to-day life, even if you think that Everything follows a logical order, with The Sims events will always happen that will make you have a few surprises.
