Description

Since it saw the light in 2004, the social network has changed greatly, from being a place to see photographs, talk with our contacts and post comments, to be a real monster that practically allows us to do anything that we can occur. And is that for example in the current Facebook we can keep abreast of the news, make live videos, see photographs, videos and comments from our contacts , but also play some of the most popular games of the moment. The use of the application has been complicated with the passage of time, and with the introduction of new features, which, yes, we liked the majority of users. Despite the many options that it offers, it is not too complicated to handle and manage with a certain ease since one of its main characteristics is simplicity , which allows users to use it from a few years old, passing through teenagers and even reaching to the elderly. Its use, as well as its download is free , although in return we will have to see the huge amount of ads that have been making a dent in Facebook. In addition, the integrated purchases within the games offered by the social network, are a reality with which we must coexist. For all this it is important that we monitor who we allow to access Facebook, and is that perhaps, the smallest of the house are not prepared to dispose at will of a profile on the most popular and popular social network in the world.
