The new game from the creators of Clash Royale and Clash of Clans has become a success, in less than a week since its launch it had already been placed in the top of the most downloaded. Using a formula similar to its predecessors, **Brawl Stars** is a very fun title to spend hours with.

With endless game modes, the moment to start a game is very exciting. The objective is to destroy all your rivals, although this is not the only way to be victorious. Most of its modes are based on teams of 3 against 3, where each of them will have to overcome a challenge that marks them. These are very varied and can range from collecting gems to eliminating your enemies in a certain time, and these are just two examples.

In Brawl Stars, even if you play as a team, you don't have the possibility to communicate with the rest of your members, so coordination is very difficult and is only possible if you are in the same place as the others. To get over all the obstacles and win the duel, take a good look at your mission and focus on it. **Download Brawl Stars for free**, you find it available for **Android and iOS** devices.

The entire design of this game is adapted for mobile devices, which will make it much easier to control your characters. The way you shoot will also be much more accurate, it doesn't matter if the opponent is near or far, even if he is escaping laterally, all you have to do is aim and shoot.

Brawl Stars is divided into two parts, on the one hand you can collect rewards by overcoming the different levels and on the other hand there is its quick game, related to the competitive one. In this mode you play to win or lose trophies, each of the brawlers saves the trophies they have won, adding them to their own account. With these you can unlock up to 6 new characters and they will also be used for pairings, depending on which one we have chosen. It is important that you play with everyone, in this way you will get the entire collection of trophies.
