## Description

How to download Bitjmoji? Step 1 In the list of installed apps on your phone we need to find the " Play store " icon or " App Store ". We run the application (in the following screenshot marked with red). When the store starts, enter the name of the Bitmoji app in the search bar. After selecting from the list of applications that we are interested in, we select the option "Install". You will be asked to add a payment option. Please note that the fee will not be charged until you make a purchase. Of course, you can skip this step and later return to the data replenishment. Once the installation is complete, we return to the main desktop and run the application. Step 2 It's time to create an account. You can sign in with Snapchat (if you're using this app) or sign up with an email address. We will focus on this second option. Enter your birthdate and click "Continue"... Step 3 Create your own avatar, face shape, skin color, eye color and hair, then clothing. After creating your own avatar, you'll get access to a variety of emoticons that express your various emotions through your avatar. How do I insert emoji into a photo on Snapchat? After taking a snap, click on the top of the sticker icon, then in the open window at the bottom, select the smiley faces Bitmoji icon. Choose your own emoticon and then insert as a sticker into your photo (Snaps) Have Fun!

## Review

More and more applications offer us the possibility of adding personalized details to our social conversations. This is the case of the **Bitmoji application**, the nice emoticons that are already part of our day to day. These serve to express emotions or ideas with our own doll.

This application allows you to get an animated version of yourself that you can use on different social networks. The way to achieve it is very easy, you just have to install it on your mobile phone and choose all the features that best suit you. **Download Bitmoji for free**, you find it available for the main operating systems, **Android** and **iOS**.

If you are tired of ordinary emoticons, this is your great solution. Although it is part of the Snapchat family, it was initially developed by Bitstrips in 2007 with the aim of creating digital

comics with the personalized avatars of its users. Little by little they have been taking a niche and it is one of the most downloaded apps, with millions of users around the world.

You will be able to personalize all the physical aspects of your digital version, one of the **advantages of Bitmoji** is that it has endless options to choose from, so you will always find that aspect that makes it look much more like you. In addition, each emoticon can be changed whenever you want and without limits, so you will have thousands of results. From the application itself, updates are shown that are adapted to the different events on the calendar so that your avatar goes with fashion or festivity. The ultimate goal is to get your own gallery of these personal dolls to use in your conversations quickly and easily, creating your own Bitmoji keyboard.

Start creating your animated version and share it with your friends, you will surprise all your contacts and make your talks fun. Having your own collection in the **free Bitmoji app** is very fashionable. Not only can you use them in your conversations, you can also add them to your own publications as if they were stickers.
