For those who love games with a lot of speed and action, **playing Bloons TD 6** is the solution to all their pleas. The most famous monkeys have returned in their sixth edition to continue defending their territory from the deadly water balloons. Before its launch there was already a lot of expectation to discover if what they promised would be true, and its development team has delivered on what was promised.

It is true that most of the titles that we now find about games for mobile devices stand out for their design and have graphics that are very typical of other types of platforms, but these require a lot of space on your phone as they are very heavy, that is why Simpler games continue to triumph among users, there is the key to the success of this game, in its simplicity it is addictive.

**Download Bloons TD 6**, you find it available for **Android** and **iOS** devices.

As in the previous installments, you will have to manage to place your monkey towers strategically to prevent the launched balloons from crossing the battlefield and going from one extreme to another. Its mechanics are that simple, but do not think that it will be easy to achieve it. You will need to do your best and plan your strategy well to be victorious. But do not worry, one of the **advantages of Bloons TD 6** is that the game itself will help you improve as you progress through its different levels and without realizing it you will be more and more precise.

Each level is made up of maps that will be the path that the flying balloons cross. These will be your main enemies, who will try to invade our town to destroy it and so we must prevent it with all the tools you have at your disposal. The good thing is that they only travel in one direction, so it is easier to know the trajectory, but it is not always the same, so you have to be very aware. And all this being your character a monkey with many resources.

Study the maps well and place your apes in the key points of the **Bloons TD 6 game** to be able to face the enemies. Each one has special characteristics and to get them you will have to pay with the coins that you collect to overcome the different levels. Get them all and manage to build a battalion that can face all its enemies.
