

Class Dojo

The ideal ally for teachers to keep classrooms organized

Review

There is a platform that is going to become a strong ally for teachers, helping them to manage their classrooms and to maintain very fluid communication between teachers and their families. This is the **Class Dojo application**, the mobile application that will allow you to have all your class organized and in which all those involved, teachers, students and parents intervene.

It will be based on the behavior of the students to manage the scores through an interface, in which the guidelines for these points will be given previously, adapting to the needs of each of the classes. If she behaves well and performs all her tasks, she earns points, if on the contrary she only annoys the rest of the students and does not do anything that is asked of her, she will have a negative score. **Download Class Dojo for free**, you find it available for **Android** and **iOS** devices.

This grading system will depend on the teacher at all times, since it is who decides the values to be added and subtracted and the amount of these points. Different classrooms can be created, so you can have different groups in each of them. If they are different, the grades will be too, so they will be customized individually, no matter what you score in one, it may not be in the others.

One of the **advantages of Class Dojo** is that you can access it from anywhere and at any time, its application will allow you to always be aware of what is happening in your classrooms. With it, you will be able to monitor attendance, the scores of each of the students and even interact with parents if necessary.

One of its latest novelties is found in its new Class Story function, it is a type of Facebook-like wall in which texts and images that serve for the normal functioning of the class will be published, such as the tasks that have been carried out.

Family members have their own section within **Class Dojo**, where they will enter to speak privately with the teacher, without having to make an appointment, or seeing what is being added to the virtual board of their child's class.
