Review

Games and mobile applications are the tools we use the most on our devices, the way we use their utilities has changed, if before the fundamental thing was to call or send a message, today that is the most basic thing we can do and There are even other apps that make it easier for you to communicate with other people in multiple ways.

Today games are part of our day to day, there is always an update or a new game to try on your phone and the average number of hours that an average user spends playing with their mobile device continues to rise. This often means that the phone does not respond correctly due to the technical requirements of the title. To solve many of these problems, there is a series of applications that will help you to continue playing your favorite games without noticing any problems, including **Game Booster 4x Faster Free**.

This free application allows you to increase the performance of your phone while playing mobile games. This is possible using artificial intelligence that helps optimize the game, improving image resolution and using HDR graphics. Download **Game Booster 4x Faster Free for free**, you will find it available for **Android** and **iOS** devices.

The way it works is based on reducing the consumption of resources made by some apps that run and leave residues in the RAM, on the one hand, and on the other, readjust the operation of the processor and the GPU. This ensures that it is the best possible performance, including 3D graphics.

With a very clear interface, you just have to select the game you want to run and select the mode you want. It has four levels of operation, with which we can decide the degree of intervention we want for our device. We can choose from only reducing battery consumption to the one known as Ultra in which we will make the most of the hardware. The **Game Booster 4x Faster Free application** is fully customizable, you can choose its configuration to suit you and what you need to always get the best performance.

✓ Pros

- Ideal proposal for gamers

✗ Cons

- Works better if you use the paid version

- Many options
- FPS control
- Resolution in HDR
- Some games do not improve
- May delete game data
- May overheat some devices
