Review

Technology generated many changes in everyday elements of our lives. Nothing is the same anymore and many areas that used to be done only in person are now also carried out virtually. Among one of these sectors is education. It is very normal today to take classes, courses or complete careers at a distance. To facilitate the task, there is **Google Classroom**, one of the best **free Google apps**.

Google Classroom is the platform that the internet giant offers to teach classes and develop an online educational environment. It can be accessed from computers or mobiles through its app for Android or iOS.

The **benefits of using Google Classroom** are many. Your educational space will improve considerably once you learn to use this tool. As is often the case with Google products, its interface is simple, agile and intuitive, which will mean that, with just a few hours in the program, you learn to configure it in the best way.

If you are a teacher or are in charge of a course, you can program all the content you want to share in a very simple and accessible way for your students. You have the opportunity to create a classroom, assign a name to it and from there share access with a simple link to all the people you want to add. In addition, you can add activities which have comment spaces enabled to provide feedback for whoever does it.

In addition, when **using Google Classroom**, you can apply and synchronize thousands of apps approved by education specialists that help in learning and development.

From the students' side, the tool is very efficient as they can follow their learning path in one place. In addition, the materials such as documents, presentations, videos and images that are shared can be downloaded and stored automatically in Google Drive.

Google Classroom is another of the tools that Google makes available to users to make their task easier and more effective. In this case, the area that benefits from this service is education thanks to a powerful and efficient application.

✓ Pros

✗ Cons

- It's free.
- You can quickly see your exam dates.
- Can be run on all devices.
- It's easy to use.
- The teachers have a lot of extra work just managing the tool.
- You must have an internet connection.
- You can only access from mobile, tablet or computer, if you do not have one you can not use it.
- The interaction is more limited
