### Review

---

Now you can meet your neighbors without having to visit house to house, in the comfort of your own home and only needing your mobile phone. With the **Nextdoor application** you will have contacts with all the people who live around you, connecting with them and focusing on your own neighbors.

With this app you will be able to know what is happening around you, in your neighborhood or in those closest to you and interact with the people who live near you. Although it has been active for a long time, it was only recently that it achieved its true success. In the United States, it has been a revolution, with millions of active users who actively participate by providing their information to help their neighbors. **Download Nextdoor for free**, you will find it available for **Android** and **iOS** devices.

This social network is based on the social aspect of people and on contributing positively to their neighborhood, these are the data on which Nextdoor relies to become the favorite of its users, dealing with local issues and getting closer to the people around you . To use it, you just have to get 10 other people who live near you to also sign up for three weeks. Use the geolocation of the mobile devices of all of them to verify that they are neighbors and thus activate a new neighborhood and continue expanding this new community.

The main mission is to create strong communities, strengthening, and creating a safe place in which to meet with your neighbors and discuss the issues that matter most to this neighborhood or even talk about events and events that occur in your area. It also has other very useful uses, such as creating events or posting notes that report lost items, offers, or even looking for people to share a car with.

**Nextdoor** offers you the possibility of discovering what is happening in your neighborhood and interacting with all the people who inhabit it, not only those with whom you share hobbies, but also those who live in your area and who still do not know of its existence. Dare to discover all those neighbors who have the same interests and you have not yet had the pleasure of meeting them.

✓ Pros

✗ Cons

- Safe environment
- Good community
- Free download
- Original proposal
- Not available in all regions
- Some problems with registration
- Interface could be better
- Many use it only for trading
