### Review

---

Continuing to study, especially languages, is one of the main hobbies of millions of people. Knowing the secrets of all subjects and other languages â€œin order to communicate with other people throughout the world has been pursued for many years. Until now it was something that could be costly for the brave who tried and a lot of time and effort was wasted to master them.

For this reason, **games and mobile applications** have been found to be a great ally for all those who do not have the time or money they need to study a language. Among all those that you can find in the virtual store market, there is one that stands out for being a very different option and in which you will learn while having fun, **play Paper's Grade, Please!**

This game already accumulates millions of users, standing out for being something radically different from what we are used to and being focused above all on children and their learning.

**Download Paper's Grade, Please! free**, you find it available for **Android** and **iOS** devices.

Its game mechanics are very simple, you will have to evaluate the students in your class by solving the different problems that arise. So if you like puzzles, word games, and mini-games, this will be your new favorite game. You will be a teacher correcting the students' exams and for which you will have to know the answers.

You will gradually increase the level of difficulty of the tests that you have to solve correctly, so at the beginning it will be very easy to get through the levels but little by little things will get more difficult and you will have to give your best from you to find out the solutions. The class progresses with you, so new problem mechanics will be added and everything gets complicated for you.

One of the **advantages of Paper's Grade, Please!** is that without realizing it you will learn while you are leveling up. The game has a lot of different levels and mechanics, so you don't have to worry about stopping learning.
