Review

Putting your face on the body of a famous person is one of the fashions of the moment and to do it with totally credible results is the **REFACE** application. In a very fast and simple way you can become whoever you want, dancing like Shakira or ruling the seven kingdoms like a true Khaleesi.

It is still one of the most popular applications and the reality is that millions of people have already tried it and have become their favorite character, making it one of the most downloaded from the application stores. **Download Reface** for free, you find it compatible with **Android and iOS devices**.

With a very simple interface that will make its use very easy, the first thing you will have to do once you have it installed on your mobile phone is to take a selfie so that you have a face with which to start adding it to the most popular video clips you have in your library. It is a totally free app with which you will have the possibility of putting your face in 5 videos every 3 and a half hours but it also has a paid version in which you will have other advantages such as that you will not have to wait to continue putting your face, or the video limit.

You can take all the photos you want in **Reface**, in case the first one does not convince you, or even choose one that you have in your own gallery and you already know that you look good and you like it. As soon as you have selected the image you want to use, the application takes a few seconds to put the face on the body of the character we have chosen.

Most of the videos it offers are video clips, although we also find short videos made up of smaller ones with a compilation of the artist or of films and series, such as the sequences of Game of Thrones in which you become Daenerys herself Targaryen.

The results can be very funny and you can share them with your friends through social networks. **Reface** has a multitude of possibilities, don't be afraid to try them all, from the trendiest videos to great pop classics.

✓ Pros

- Simple interface, easy to use
- Very fun
- Ability to share with social networks
- Many options for videos and GIFs

✗ Cons

- It can become repetitive
- There are doubts regarding your security and data protection
- Advertisements within the app

- Time limit to use it if the subscription is not paid
