Review

Speed and simplicity are two characteristics that every app must have today. If they are not present, it is difficult for a product to become popular. On the contrary, tools like Smart Search & Web Browser are very popular precisely for presenting agile, simple and intuitive functions.

Smart Search & Web Browser is a powerful search engine and browser that brings together all the advantages of the best offers of its style. The tool stands out for its speed and returns the results of the most important sites on the web such as YouTube, Amazon, eBay and Wikipedia to user queries.

The program is simple to use, has no delays when starting and has the possibility of creating widgets for quicker access. It has a number of advantages such as auto-complete of searches, voice search, dark mode, history, reading mode and complete control of video functions.

✓ Pros

- It is possible to install individual widgets
- You can make this application your integral resource for everything
- The Bookmarks section is divided into the Speed Dial and Reading List categories, so you can simply add links to webpages you'd like to read later

✗ Cons

- They don't want to unlock "premium" features that are standard on most other browsers
- There is a lot of advertising without blocking
