Review

Many people love ghost stories. The presence of strange, extraordinary or rare beings. The possibility of living, without knowing it, with spirits of the past. Previous lives, truncated, that ended suddenly. Throughout history humans have tried to find ghosts, witches, monsters, and all kinds of supernatural beings. The mysterious catches. We do not know what is in the afterlife and we want to reveal it. It can be in old, ancient or abandoned places, but there may also be dark presences in our room. It cannot be said that there are unknown spirits or energies, but neither can it be denied.

If you **want to find ghosts with your mobile**, today we will tell you all about a program that you can incorporate into your device and detect if there are presences from beyond or not. **Ultimate Ghost Detector** will help you measure all the necessary indicators to know if you have supernatural presences around you. Either in your house or if you visit haunted places.

Using Ultimate Ghost Detector will help you measure values â€‹â€‹like EVP and EMF. EVP corresponds to Electronic Voice Phenomena and they are audio records that are recorded by devices and can determine whether or not there is the presence of energy. On the other hand, EMF is an indicator belonging to the field of physics that refers to electromagnetic fields. They basically measure and indicate the presence or not of energy.

With Ultimate Ghost Detector you can measure both variables wherever you want. Either EVP or EMF, record whatever you want in this app that you can get on **Android and iOS**. The epp developed by MRE Programming has 5 modes of use. You have the Advanced EMF, Simple EMF, EVP Recorder, Motion Detector and Multiple Meter mode.

With Advanced EMF you will be able to detect EMF and perform analysis using graphs and tables. By using Simple EMF, you can measure the same indicator but see it in a simple image that will move whether or not it finds movement.

If you are looking to detect EVP, you will have the chance to record it and listen to it at another time. On the other hand, with the motion detector you can find actions or vibrations that are around you. You can support it on furniture, tables, chairs or leave it resting anywhere.

Finally, the most complex function is that of the multiple meter which aims to combine all the indicators to inform if there are movements, voices or energy present.

Among the **advantages of using Ultimate Ghost Detector** you will find that in addition to the

functions it has to measure and record EVP or EMF, you can use a built-in flashlight, quick access to your mobile camera, a compass and alarm systems with sounds and vibrations. It also has a radar sound to capture movements or sounds.

The application created by MRE Programming uses the magnetic sensors that mobile devices have incorporated. For this reason, the results it can produce are very real and reliable. This is very important data because for Ultimate Ghost Detector to work you have to have a terminal that has a sensor with these characteristics. You also have to be careful not to deposit the device near places with a high power charge because it can be dangerous.
The studios that develop the app have vast experience in the field of producing deliveries of this type. In virtual stores they have in their catalog with apps such as: Ultimate EMF Detector, MRE Acceleration Meter and MRE Mind Trainer.
The mysteries will accompany us for the rest of our days. Without them many people would be left with no reason to live. Knowing everything may be boring. Chasing the unknown is a hobby of many and technology is put with an app like Ultimate Ghost Detector at the service of adventure hunters. Discover one of the best options to spend moments of terror, fun and full of emotion.

Ultimate Ghost Detector will not only offer you a variety of ways to measure or detect supernatural presences, but it will also give you the ability to perform analysis using images, graphs and different types of sensors.
Download the MRE Programming product and dive into this horror and horror adventure.

✓ Pros

- It can be fun
- It uses sensors that are inside the mobile
- Good systems of graphics and indicators
- Various options of use

✗ Cons

- It is paid
- Complex to understand at the beginning
- The interface could look more modern
- It is not suitable for everyone
