### Review

---

You already have a tool in which to have all your audiovisual content and be able to reproduce it without problems. The **Watched application** combines in one place all the sources from which to get series, movies and entertainment programs to offer them for free.

With a very simple interface, all its operation is based on achieving simplicity of use. With a powerful search engine, it allows its users the possibility of obtaining the products that other members of its community have added. These can be saved in their own lists with which to have access to your favorites.

It has a wide catalog and one of the advantages of Watched is that it is always constantly updated. It is the users who feed the application with new and innovative new programs, series or movies. To start using it, you will only have to install it on your mobile device and you will already have access to all its files.

One of its most outstanding characteristics is its simplicity in use, with a very visual and minimalist design, it gives it a very modern appearance that will facilitate its use. **Download Watched for free**, you find it available for **Android** and **iOS** operating systems.

Its search engine is very powerful, and only by pointing to the keyword you want to see will show you all the results it has and that fit it. Once you have collected all of them, you can access them just by clicking on the one you want to see, it's that easy. The use of Watched is very safe, it is just a player that will automatically show us the content that the URL that we enter contains.

All its configuration is customizable, knowing how to do it is important to start using it. On its main screen you will have access to all the options you have to change, such as the language or the TV mode. In this section you can change the way you view it on the screen and make it more comfortable.

When watching movies on **Watched**, you just have to press on the main screen the button that appears on the main screen and is a plus symbol. On the screen that will appear next, you have to add the URL where the content you want to see is hosted and press continue. This will load automatically and all you have to do is sit back and enjoy.

## ✓ Pros

---

- Can be used on all operating systems
- Free download from the website
- Variety of functions
- Easy to use

## ✗ Cons

---

- It needs further development of its interface
- Being open source it can present security problems
- Need to support more languages
