HBO has become one of the most used streaming services, the quality of its original series and the large number of quality series and movies have placed it at the forefront of this type of platform. But it is not the only service that it offers, within this audiovisual colossus there are other products that are not as well known but that also have a lot to offer, among them we find **HBO Max**, which promises its users more than 10,000 hours of content .

Although initially it has only been launched for the United States, its expansion is gradually being achieved throughout the rest of the globe, with landing dates in other countries for the year 2021. This new service is expected to have available the entire HBO content plus other products that you will get from the different production companies that work in each of the countries where you can see it.

One of the **advantages of HBO Max** is that you can find all the iconic series of recent times, such as Friends, Doctor Who or Little Liars, in addition to the exclusive one that you can only see through this platform. **Download HBO Max for free**, you find it available for **Android** and **iOS** operating systems. To start enjoying it, you will only have to install it on your mobile phone, entering your username and password and you will be able to enjoy everything you have subscribed with your HBO account.

It is appreciated that little by little, as the television classics, the other services are disappearing from each other to find them in the future in the **HBO Max application**, this being the objective that has been sought since the giant AT&T decided to bet on launching a platform streaming content, with its multinational WarnerMedia, have all the original products and the best-known series in one place.

Apart from movies and series, there has also been talk of including some of the most important Late Nights of the moment and it is expected that in a while sports will also have a place on this platform, the possibility of adding sports content such as the NBA and the NCAA. **Download HBO Max**, which has made a masterful move to be the best service on the market and for now it is succeeding.
