### Description

---

Netflix has 3 subscription plans that adapt to your needs. The plan you choose will determine how many people can watch Netflix content streaming at the same time and whether you can watch it in standard definition (SD), in high definition (HD) or in ultra high definition (UHD). The more content you see, the more precise the recommendations that Netflix will make of series and movies that you will love. You can play, pause and resume viewing, all without ads or commitments. In addition, you can download your favorite series on your iOS or Android mobile device, or Windows 10 application . With downloads, you can see your favorite content wherever you go and when you do not have an Internet connection. If you enter from a tablet or cell phone to the Netflix page, it will automatically take you to the mobile application designed specifically for your Apple, Android or Windows device. If you access from a smart TV, it is possible that the application is pre-installed, so you only have to enter your username and password there. Otherwise you must go to the Internet or SmartTV menu and from there download the Netflix application.

### Review

---

The way of watching and consuming movies, series and television programs changed drastically some years ago. Video on demand is here to stay and there is a platform that is the number, without discussions about it so far, in the matter. We refer, of course, to **Netflix**.

You can **download Netflix** on any of the devices you have that can play audiovisual content. You have the possibility to watch it from the website on your computer, broadcast it on a smart TV or **download Netflix** on mobile phones that use **Android** or **iOS**.

The platform allows you to view content when you want, where you want and without interruptions. One of the main advantages of Netflix is that you can play, pause, fast-forward or rewind the content as many times as you want without any problem. Even a large part of its productions can be downloaded to **watch Netflix offline**.

You will not have advertisements or cuts during the broadcast of your favorite movie or series.

The platform has a successful and very well elaborated recommendation system that will suggest what to watch according to your tastes, preferences and behaviors. The interface is very well

designed and very easy to navigate. You can search and filter content based on a large number of categories.

Netflix offers a wide variety of audiovisual products. You will have at your disposal new movies, classics, TV shows, series and documentaries. All genres are covered in the app. It even has an exclusive section for children available.

Subscription to the service is paid but can be shared. Each member of the family has the possibility of having their own profile and personalizing the experience as they like best. From putting a nice avatar that identifies it to receiving unique suggestions for that user.

Netflix changed our habits when it comes to watching series and movies. All of their products become popular and are the topic of conversation in most homes and offices around the world. Do not stay out of one of the most important cultural phenomena of recent years.

Discover Netflix, all its original content and watch movies without stopping.

## ✓ Pros

---

- Simple and easy to use
- No ads
- Original program
- You can download the content and see it offline
- Different membership plans
- It's affordable
- Fantastic experience

## ✗ Cons

---

- New content is not immediately available
- Outdated library
- Each region has a different content offer.
- Many series have only a few seasons and are not complete.

## Tips

---

1. You can delete series and movies from the list of Views - Save data by changing the streaming quality - Disable automatic chapter playback - Download movies and series to watch offline - Parental control - Customize the subtitles
