Fire TV Change your multi-screen TV into a personal movie screen for playing with our Fire TV application. Join Twitch and see for yourself!

Review

There are inexplicable phenomena. The world of the internet, social networks, platforms, **apps and games** gives us one surprise after the other. Many projects start one way and end up totally in another. Not only because they become very popular without us waiting for it, but because their function suddenly changes.

The social network **Twitch** was born as a site to broadcast live events related to video games. It was created in mid-2011 and as the years have passed it has become one of the most important players in the world of the network. Such was its growth that it was acquired by the giant Amazon.

Twitch can be used both from the computer's website and from the free app available for mobile phones, it works on **Android or iOS** operating systems. The alternative for phones uses and provides the vast majority of the functions that the official website has. You can enjoy all the benefits of the social network in the comfort of your mobile.

By **downloading Twitch** you will have the possibility to join the live session of your favorite influencer and exchange ideas, comments and opinions with other people who are in the same room. You can also start a live session yourself just by activating the camera. Browse easily and find the content that is most useful to you. Even if you are not in a lot of light you can activate the dark mode to see better.

But Twitch has undergone one of the most interesting changes in the media in recent times. From being an exclusive platform in the world of videogames, it became a communication channel by itself. That is, popular programs of all types of content moved to broadcast on the social network owned by Amazon.

In this way, today it is possible to find programs of general interest, cinema, cooking, singing classes, dance or whatever on Twitch. Even radio programs moved to broadcast on the video platform.

Twitch provides a wealth of possibilities and its smooth and simple interface makes it easy for communities to connect.

✓ Pros

- Build a community.
- A chance for fame.
- Can promote things if you are a big streamer in the long run (advertise).
- Money from donations.
- Doing what you love (playing games while receiving payment).
- You can help others or cooperate with your favorite streamers.

✗ Cons

- It takes a long time before you start if you start from scratch (you're not known or popular on Youtube or other social media before streaming).
- It can be emotionally harmful because you get a lot of insults.
- It is very difficult to get a partnership.
- If you can not think of something that could be unique or attract people's attention, beginnings will be difficult for you.

Tips

1. Communicate with your community
2. Collaborate with other streamers whenever you can
3. Be patient
