Review

The Weather Channel is a very famous application especially in Spain because it connects a lot of people and lets you know the time of your city and others if you want to see them. His 10-Day Accurate Weather Forecast success for miles of cities in the world is well known.

It is a very famous application, perhaps the most famous in Europe because it is easy to download, easy to use and very convenient because depending on the day you choose it tells you what the weather is like. If there is only sun, clouds, rain, snow and everything you want to know about the climate of your city

Provides forecasts over a period of **10 days** updated four times a day. It has interactive maps that can be customized to show forecasts of temperature, weather and wind On the map of any country.

If you choose these pages of weather forecasts to have detailed information every 3 hours and live reports. Watch the album at the bottom of the web, a photo album of weather with a nice selection of weather extremes throughout the world, such as hurricanes, floods, storms, tornadoes and snow falls.

If something always happens about the temperature and weather conditions, this page tells you in real time, without delays or other things that can cause problems of all kinds.

So, if you do not have one, now you can always be connected to your country and also to others, always if you want.

✓ Pros

- The quantity of meteorological information that it offers us is enormous and of great precision".
- The radar maps that we can access from our mobile device are extremely accurate, simple and you will hardly find them in another application of this type".

✗ Cons

- Sometimes the large amount of information it offers can exceed any user".
- You can't really do customization".
- You may find that the locked interface forces excessive scrolling".
- Annoying ads".

- The 15-day view forecast can be consulted in few applications of this type and nowhere so precisely and clearly".
- Despite everything it offers us, it can be downloaded for free from Google Play as well as from the App Store".

Tips

1. Checking weather information in real time from a mobile device was never so easy
2. If you want to be informed of any weather change you can set up alerts or create widgets as long as you have an Android device
3. Rain alerts are one of the best inventions of The Weather Channel
4. Do not be afraid when you start the application for the first time, we know it's a lot of information at a glance, but you'll end up knowing how to handle it without any problem in a short time
